## **DETAILED ACTION**

### ***Examiner's Amendment***

1. An examiner's amendment to the record appears below to correct obvious errors. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

- a. In claim 1, lines 14-15; "an allowable frequency range" has been changed to --- the allowable frequency range ---.
- b. In claim 14, line 12; "outputting a frequency error signal" has been changed to --- outputting the frequency error signal ---.
- c. In claim 14, lines 13-14; "an allowable frequency range" has been changed to --- the allowable frequency range ---.
- d. In claim 14, line 15; "the average frequency range; computing circuit" has been changed to --- the average frequency computing circuit ---.
- e. In claim 15, line 12; "outputting a frequency error signal" has been changed to --- outputting the frequency error signal ---.
- f. In claim 15, lines 13-14; "an allowable frequency range" has been changed to --- the allowable frequency range ---.

- g. In claim 16, line 12; "outputting a frequency error signal" has been changed to --- outputting the frequency error signal ---.
- h. In claim 16, lines 13-14; "an allowable frequency range" has been changed to --- the allowable frequency range ---.

***Statement of Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach a digital PLL circuit for generating sampling clock signals with respect to a plurality of channels for sampling reproduced information simultaneously from a plurality of tracks of a recording medium, comprising "a gate circuit for masking the frequency error signal in an operational mode other than a tracking mode", or "a speed variation detecting circuit in an average frequency computing circuit for determining a rate of variation of the average frequency in a predetermined time" or "the average frequency computing circuit is reset in a calibration mode for performing calibration of the frequencies to be phase locked" or "the average frequency computing circuit includes a holding circuit for holding the average frequency which has been obtained immediately previously when all of the channels are in an operational mode other than a tracking mode" or "when the average frequency computing circuit outputs the frequency error signal for any channel, resynchronization of the sampling clock signals is performed only for the erring channel".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
